

Multi-layer performance fabric uses patented ultrasonic-integration technology to create more than 100,000 pressure-relieving passageways to deliver a subtle response and recovery. The subtle response can be demonstrated at retail.

- **Unique, Customized Comfort** – Pockets absorb and dissipate pressure as weight is applied to the sleep surface.
- **Gentle Feel** – Evenly distributes weight across the mattress.
- **Designed for Modern Mattress Builds** – The most comfortable, non-upholstered innerspring unit on the planet.
- **Smart Response** – The only innerspring-infused smart-response material on the market.
- **Packable and Shippable** – Can be compressed, folded, and rolled.

NanoCoil® Bloom™ micro-coil
