

SYMMETRY™ DUOCOIL 5-ZONE

with Quantum Edge® Elite

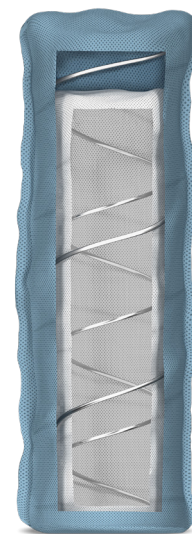

Leggett & Platt®

BeddingComponents.com

The revolutionary fabric-encased coil-within-a-coil technology blends the performance of multiple coils into a single coil unit. This 5-zone self-posturizing system identifies and reacts to individual body movements, offering superior levels of sleeping comfort and support while enabling essential body alignment to deliver an unparalleled sleep experience.

- **Dual-Acting Coil** – The exterior coil delivers a soft, contouring feel while the interior coil reacts with the right level of support/pressure relief as weight is applied.
- **5-Zone Support** – Firmer support at key shoulder and hip areas to enable better spinal alignment.
- **ActivEdge™** – A reinforced perimeter, made up of narrow-diameter Quantum® coils, that frames the sides, delivers a consistent sleep surface, and reduces that roll-off feeling.
- **Customized Comfort** – Adjusts to body movements, thus isolating motion transfer and reducing partner disturbance.
- **Packable and Shippable** – Can be compressed, folded, and rolled.

DuoCoil

| Product Name | Coil Height | Coil Count* |
|---|-------------|-------------|
| Symmetry™ DuoCoil 5-Zone with Quantum Edge® Elite | 8" | 1,084 |
